INTRODUCTION AND PROJECT OVERVIEW 1

DATA COLLECTION METHODS AND EVALUATION OVERVIEW 2
- Data Collection Method 1: Review of project materials 2
- Data Collection Method 2: Surveys 2
- Data Collection Method 3: Communications with Principle Investigators 3
- Data Collection Method 4: Site Visits (including classroom observations, interviews, and artifact collection) of institutions using the materials with undergraduate (and graduate) students 3
  - Schools and Instructors Visited (descriptions) 3
    - University of Texas at Austin, Austin, TX 4
    - Amherst College, Amherst, MA 4
    - Williams College, Williamstown, MA 4
    - Emory University, Atlanta, GA 5
    - Agnes Scott College, Atlanta, GA 5

ASSESSING THE PROJECT OBJECTIVES 6
- Specific Aim #1: To restructure, refine, and add features to the existing tutorials 6
  - (a) Restructuring 6
  - (b) Explaining the equivalent circuit 10
  - (c) Adding new channel types 11
  - (d) Relating NIA to health and physiology 12
  - (e) Taking advantage of increased computer speed 13
  - (f) Leading students to understand the limits of the voltage clamp technique 14
  - (g) Major changes to existing threshold and synapse tutorials 14
  - (h) Minimovies for faculty to introduce the tutorials to students 16
  - (i) Project "Detour" – Restructuring the Interface and Other Tutorial-related Issues 18
    - Interface and Systems-Related Issues 21
    - Tutorial Content-Related Issues 22
    - Interface and Systems-Related Wish-list Items 23
    - Tutorial Content-Related Wish-list Items 24
- Specific Aim #2. To extend the range of NIA downward to the chatter of single channels and upward to the behavior of simple circuits 25
  - (a) New tutorial in single channel behavior 25
  - (b) New tutorial for modeling a simple network 29
- Specific Aim #3. To add new tutorials to the original prototype. 30

NIA2 PROJECT IMPACT AND CASE STUDIES 32
- Overall Project Impact of NIA2 on the Neuroscience Education Community 32

How are the materials being used in the undergraduate classroom? 32
Undergraduate Institutional Use Examples from the Initial NIA2 Survey 33
Mount Holyoke College 33
University of Maryland 34
City University of New York 34
University of Evansville 34
Dominican University 34
University of Wisconsin Madison 35
Other Undergraduate Institutional Use Examples 35
Grinnell College 36
Pomona College 36
Cornell University 36
How are the materials being used in the graduate classroom? 38
Graduate Institutional Use Examples from the Initial NIA2 Survey 39
University of North Carolina Chapel Hill School of Medicine #1 39
University of North Carolina Chapel Hill School of Medicine #2 39
University of North Carolina Chapel Hill School of Medicine #3 39
University of Maryland 40
Emory University 40
University of Wisconsin Madison 40
Other Graduate Institutional Use Examples 40
What do users like and dislike about NIA2? 45
What have instructors (and future instructors) learned from NIA2? 48
What recommendations do instructors have for future instructors? 49
How do we get more instructors to use NIA2? 51
Case Studies 52
Case Study 1: The University of Texas at Austin, Austin TX 53
University of Texas at Austin Class Observations 53
University of Texas at Austin Informal Interview with Instructor Nace Golding 58
University of Texas at Austin Informal Interview with Jennifer Morgan 59
Case Study 2: Amherst College, Amherst MA 62
Amherst College Class Observations 62
Amherst College Informal Interview with Instructor Steve George 66
Case Study 3: Williams College, Williamstown, MA 67
Reflections on William College's BIOL 304 Neurobiology with NIA2 68
Reflections on William College's NEURO 201 Introduction to Neuroscience with NIA2 70
Case Study 4: Emory University, Atlanta, GA 72
Emory University Class Observations 73
Emory University Student Focus Group Comments 76
Emory University Faculty Interviews, Surveys, and Follow-up Correspondence 77
Case Study 5: Agnes Scott College, Atlanta, GA 79
Agnes Scott College Class Observations 80
Agnes Scott College Focus Group Discussion with Students and Instructor 82

*SUGGESTIONS FOR FUTURE DIRECTION AND CONCLUDING COMMENTS* 84
Suggestions for Future Directions 84
Concluding Comments 86

APPENDICES
A: Goals for Basic and Advanced Tutorials in Current Version of NIA2 A-1
B: Goals for Basic and Advanced Tutorials in Current Version of NIA2 A-2
C: NIA2 Minimovie Titles by Topic A-3
D: Cornell University BioNB 491/BMEP491 Course Syllabus and Calendar A-4
E: Institutions That Have Purchased NIA2 as of November 2008 A-7
F: University of Texas at Austin Bio 365L Lab Manual Section 3 Excerpt A-9
G: University of Texas at Austin's BIO365L NIA2 *Na Action Potential* Lab Handout A-16
H: University of Texas at Austin Bio 365L Lab Manual Laboratory 4 Excerpt A-19
I: Amherst College Biology 35 Lab Instructions A-23
J: Amherst College Biology 35 Exam 2 A-24
K: Williams College NEURO 201 NIA2 Lab A-26
L: Emory University's BIO 360L/NBB 301L Course Syllabus A-33
M: Emory University BIO 360L/NBB 301L *Coincidence Detection* Lab 10 Notes A-36
N: Emory University BIO 360L/NBB 301L *Coincidence Detection* Homework Set A-41
O: Emory University BIO 360L Teaching Assistant's Poster Presentation on Teaching Neuroscience with NIA2 at Society for Neuroscience Conference A-43
P: Agnes Scott College Biology/Psychology 250 Foundations of Neuroscience 1: Excitable Cells and Synapses Course Syllabus A-44
Q: Agnes Scott College Biology/Psychology 250 Foundations of Neuroscience 1: Action Project Assignment A-47
R: Agnes Scott College Student's Components of Na and K Channel Excitability Project Presentation Slides A-49
S: Agnes Scott College Agnes Scott College Biology/Psychology 250 Foundations of Neuroscience 1: Action Project Assignment Grading Rubric A-54
T: Agnes Scott College Student's Gabaergic Synapses: Target for psychoactive drugs, search for drugs and inhibition Project Presentation Slides A-55
U: Agnes Scott College Student's Partial Demyelination: the problem with MS Project Presentation Slides A-58

## Table of Figures
