

MAC OS X INSTALLATION

1. Insert the *Neurons in Action 2* CD and double-click the CD icon to open it.
2. Double-click the folder for your version of Mac OS X (10.3 or 10.4) to open it.
3. Drag the  “NIA2.app” icon into your  Applications folder.
4. After the files have been copied into the Applications folder, eject the CD and then double-click the “NIA2.app” icon that is now in your Applications folder to launch the program.
5. The Firefox browser will be launched, and the *Neurons in Action* homepage will be displayed.
6. If, instead, you see a Firefox update page, simply close the  tab to view the *Neurons in Action* homepage.

See “Installation Instructions” on p. ix for more detailed instructions and additional important information.

WINDOWS XP INSTALLATION

1. Insert the *Neurons in Action 2* CD. Go to “My Computer” and open the NIA2 CD icon.
2. Drag the entire “NIA2PC” folder into your C: drive. (Or Copy the folder and Paste it into your C: drive.)

IMPORTANT: *Neurons in Action will only work when the “NIA2PC” folder is on the C: drive, at the top level, and nowhere else. (Do not put it anywhere else, such as “Program Files” or the Desktop.)*

3. After the files have been copied to the C: drive, eject the CD and then double-click the “NIA2PC” folder that is now in your C: drive to open it.

4. In this folder, double-click the “NIA2PC” program icon  to launch *Neurons in Action*.

- If Firefox is already installed on your computer, it will launch and display the *Neurons in Action 2* homepage
- If Firefox is not already installed on your computer, follow the on-screen instructions to install Firefox, then close Firefox and re-launch *Neurons in Action* to see the NIA homepage.
- If, instead, you see a Firefox update page, simply close the  tab to view the *Neurons in Action* homepage.

See “Installation Instructions” on p. ix for more detailed instructions and additional important information.
